DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Hayashi et al.

Applicants' attention is drawn to the relationship as disclosed in this document with respect to the spot size and the size of the photodetectors. Note that the spot size varies between 20 mum and 50 mum.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2653

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over the art as applied to claim 1 above, and further in view of Kasami et al.

The particular NA is not found in the base reference, nevertheless the use of such NA s in this environment is taught by the Kasami et al reference.

It would have been obvious to modify the reference of Hayashi et al with the above teaching from Kasami et al; motivation is to increase the recording density of the record medium as taught by Kasami et al.

Claim Rejections - 35 USC § 112

9. Claims 2,3 and 5 are rejected under 35 U.S.C. 112, second paragraph and fourth paragraph as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention and failing to further limit the parent claim.

These are dependent claims and yet fail to further limit the PICKUP device of claim 1. The examiner interprets claim1 as apparatus – e.g. a pick up device having two elements. These

Art Unit: 2653

claims (2, 3 and 5) do not further limit these elements, but attempt to define the record medium structure.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hector et al, Kim and Wierenga et al are cited as illustrative of record medium structure in this environment. .
